

Littlewood
Road, Chester

Type of System: Stormwater Attenuation and Rainwater Harvesting Tank

Date of Installation: June 2010

Tank Size: Attenuation – 7.05m x 6.05m x 0.55m = 23.46m³
RWH Tank – 4.05m x 2.05m x 1.8m = 15m³

Site Details:

A new housing developments in Littlewood Road, Chester, had restrictions on site discharge, This led to the development of an alternative drainage solution that would allow stormwater runoff from the site to be attenuated, prior to entry into the existing stormwater mainline system. The runoff from the roofs entered the recycling tank, enabling the water to be reused for flushing the toilet and for washing machines.
