

Thanet Earth, Kent

Type of System: Soakaway Tank

Date of Installation: December 2008 thru 2009

Client: Fresca Group Ltd

Contractor: Fitzpatrick Contractors Ltd

Site Details:

Thanet Earth is an exciting horticultural development that will comprise of one of the largest greenhouse sites in the UK. Seven huge greenhouses, each one the size of ten football pitches, will be erected for the large-scale production of salad crops on a 91 hectare site.

Fitzpatrick Contractors had already installed several of the soakaways at the site, using ESS Versavoid modules wrapped in Geotex 225FF filter fabric. Each soakaway features an access chamber to allow periodic inspection, as required.
